

## Project\_Milestone2

Project Requirements:

### Screenshot of Project Management Tool: Trello

#### **Sprint 1: User interface and Development Environment (due by: March 13th)**

- Learn Xcode, Auth0, Swift, SQL (due March 10th)
- Begin App UI (Main page for swiping, Message Board, Settings Page,..etc) (due March 18th)

#### **Sprint 2: Create Database for User profiles and pictures (due by: March 21st)**

- Use SQL to create database
- Decide what user info to collect (name, pictures, etc) and how to store it

#### **Sprint 3: Focus on creating important application features (due by: April 5th)**

- Login (username/email, passwords)
- Permissions (location, photos)
- Fine tune UI get ready for database merge (Deadline April 5th)

#### **Sprint 4: Bring together user information and App UI (due by: April 18th)**

- Connect database with app and user interface
- Decide conditions for user's to connect with each other (dog owner seeking non-dog owner, etc)

#### **Sprint 5: Test App and User Fluidity/ Debug (due by: May 1st-5th)**

- Test swiping, matching algorithms
- Finish details and fine tuning

**(due by: May 9th)**

### **Agile Meeting**

-Decided that it was to the group's strength to focus on iOS development and scrapped Android Development

-Members who have worked on and/or have passion for graphics have been assigned to the jobs pertaining to their skill

-Members who do not have all the tools/resources given tasks that would pertain to them

-More accurate picture of what the app is and how it works

-Talked about additional components to the app and decided which ones were feasible
